

# THE QUESTION OF

## NUCLEAR POWER

A Video Resource Pack for 14-16 year olds £19.99 ex Vat

This is the case against nuclear power. *The Question of Nuclear Power* is compiled from 20 years of TV documentaries, and represents an authoritative and startling indictment of nuclear power and the atomic energy establishment.

*The Question of Nuclear Power* brings into the classroom the best investigative journalism. Each edited television extract is backed up by Briefing Notes and student Activity Sheets.

The video pack comes with 40 pages of illustrated Activities & Briefings. It is designed to be handy for teachers who want to derive the maximum from a teaching resource with the minimum of previewing and preparation.

### Issues Covered

- The safety of nuclear reactors
- The economics of nuclear power
- The impact of the industry on the environment
- The handling and disposal of waste
- Health problems at work and in the community
- The industrial links between nuclear energy and atomic weapons
- Nuclear Power and Alternative energy forms
